

THREAT MODELING USING MICROSOFT THREAT MODELING TOOL

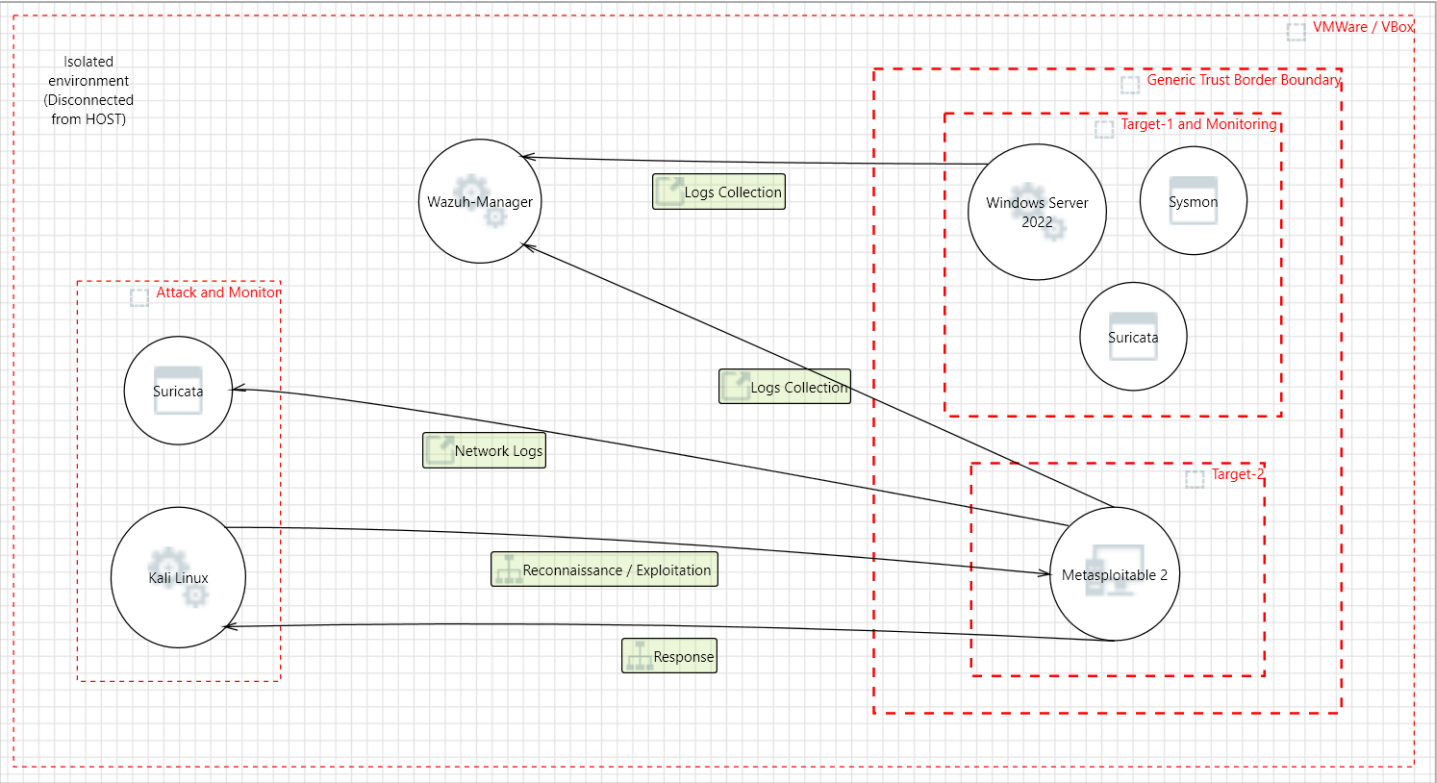

Figure 9: Threat Modeling on Microsoft Threat Modeling Tool

Interaction: Reconnaissance / Exploitation

20. Elevation by Changing the Execution Flow in Metasploitable 2 [State: Not Started] [Priority: High]

Category: Elevation Of Privilege

Description: An attacker may pass data into Metasploitable 2 in order to change the flow of program execution within Metasploitable 2 to the attacker's choosing.

Justification: <no mitigation provided>

21. Metasploitable 2 May be Subject to Elevation of Privilege Using Remote Code Execution [State: Not Started] [Priority: High]

Category: Elevation Of Privilege

Description: Kali Linux may be able to remotely execute code for Metasploitable 2.

Justification: <no mitigation provided>
