

MITRE ATT&CK Mapping

Every stage of the kill chain was tagged with a tactic and technique ID, turning the raw command log into a structured, professional-looking timeline.

Kill Chain Stage	ATT&CK Tactic	Example Technique	Lab Action
Recon	Reconnaissance	T1595 Active Scanning	Nmap scan of target
Scanning/Enum	Discovery	T1046 Network Service Scanning	Nmap service detection, enum4linux
Initial Access	Initial Access	T1190 Exploit Public-Facing Application / T1110 Brute Force	Metasploit exploit or Hydra brute force
Execution	Execution	T1059 Command and Scripting Interpreter	Payload execution via Metasploit
Privilege Escalation	Privilege Escalation	T1068 Exploitation for Privilege Escalation	WinPEAS/LinPEAS-identified path
Credential Access	Credential Access	T1003 OS Credential Dumping / T1110 Brute Force	Credential dumping concept or Hashcat cracking
Defense Evasion (discussed only)	Defense Evasion	T1070 Indicator Removal	Explained how log clearing works and how log forwarding (Wazuh) defeats it
